

SEO & WEBSITE OPTIMIZATION PROPOSAL

Website Optimization

*I WILL START BY OPTIMIZING THE WEBSITE,
WHICH INCLUDES:*

- Improving the design for a modern and user-friendly experience
- Making the website fully responsive across all devices (mobile, tablet, desktop)
- Ensuring smooth navigation and faster loading speeds

SEO

improve your website's visibility on search engines (like Google) to drive more organic (unpaid) traffic and help potential customers find our website

There are various factors that Google considers when ranking websites. We will focus on the most important ones to improve your site's performance and visibility:

1 High-Quality, Relevant Content

Content is one of the most powerful ranking factors. We will focus on writing clear, informative, and engaging content that naturally includes the right keywords. This helps attract the right audience while signaling to Google that your site is useful and valuable.

2

On-Page SEO

This includes improving core elements like page titles, meta descriptions, headings, and image alt tags. We'll also enhance the structure of your content and interlink your pages properly so that Google can easily understand and index your site.

3

Technical SEO

We will address backend issues that affect how search engines crawl and index your site. This includes fixing broken links, optimizing site architecture, improving load times, and ensuring your sitemap and robots.txt are correctly set up.

4

Backlinks improving domain authority

Backlinks are links from other reputable websites that point to yours. These act like votes of trust and authority in Google's algorithm. We'll focus on strategies to naturally earn backlinks that strengthen your website's credibility.

AFTER

Achieving these goals we will start adding uniqueness that our competitor haven't done like adding Chatbot support which will explain the customers what and why Our treatments are effect and even keep there past record

Thank you!
